## SECTION 4. FIRST AID MEASURES

### 4.1. Description of first aid measures

#### Inhalation:

When using the product in normal temperature, no special measures are required. In case of irritation caused by prolonged inhalation of hot product vapours or mists, remove victim to fresh air. If breathing is irregular, give artificial respiration. Seek medical aid.

#### Contact with skin:

Remove contaminated clothing and wash before re-use. Wash skin thoroughly with water. When an irritation persists get medical attention.

#### Contact with eyes:

Flush with plenty of water for at least 15 minutes holding the eyelids open, remove contact lenses if present. When an irritation persists get medical attention.

#### Ingestion:

If person is conscious rinse mouth with water, give 200 ml of liquid paraffin to drink. Do not give milk, fat or alcohol to drink. Do not induce vomiting - aspiration hazard. Consult a doctor.

### 4.2. Most important symptoms and effects, both acute and delayed

**Inhalation:** Inhalation of hot vapours can cause headache, nausea, vomiting and change in well-being.

**Contact with skin:** The product has degreasing properties. May cause skin dryness and irritation of the skin.

**Contact with eyes:** Contact with eyes can cause redness and transitional pain.

**Ingestion:** Ingestion may cause change in mood and motility deterioration. Aspiration hazard - the product can penetrate and damage the lungs.

### 4.3. Indication of any immediate medical attention and special treatment needed

Show the safety data sheet or label/ packaging to a person providing first aid. Do not give anything to eat or drink to an unconscious person. Treat symptomatically.

## SECTION 5. FIREFIGHTING MEASURES

### 5.1. Extinguishing media

**Suitable Extinguishing Media:** carbon dioxide, dry chemical powder, foam, water mist.

**Unsuitable Extinguishing Media:** water jet (can be used to cool the containers).

### 5.2. Special hazards arising from the substance or mixture

Fire and heat cause pressure increase in the containers, which may result in an explosion. Hazardous combustion products may be evolved in a fire eg. carbon oxides, sulfur oxides, nitrogen oxides, and unidentified organic and inorganic decomposition products.

### 5.3. Advice for firefighters

Evacuate personnel to a safe place. Cool containers with water spray and if possible remove them into safety. Prevent from entering contaminated water into sewers, rivers or other bodies of water. Dispose of waste water in compliance with current legislation. People should be properly trained and equipped with proper clothing and safety equipment. Use fire resistant protective clothing, breathing apparatus and eye protection.

## SECTION 6. ACCIDENTAL RELEASE MEASURES

### 6.1. Personal precautions, protective equipment and emergency procedures

Remove unauthorized persons from the danger area. Alert the appropriate emergency authorities. In case of a large leak enclose the area. Provide adequate ventilation. Remove all sources of ignition, extinguish open flame, do not smoke. Avoid contact with eyes, skin and clothing. Do not inhale hot vapours/mist. Contaminated area may be slippery. Use adequate personal protective equipment as required in Section 8 of the safety data sheet.

### 6.2. Environmental precautions

Prevent from entering into soil, drains, sewers, waterways.

## 6.3. Methods and material for containment and cleaning up

Seal up the leak. Small leak cover with absorbent material e.g. sand, diatomaceous earth, universal binder, sawdust and place in a tightly sealed, labelled container. Large leak collect to the labelled container. Dispose of waste in compliance with current legislation.

## 6.4. Reference to other sections

Refer to Sections 8 and 13 of the safety data sheet.

## SECTION 7. HANDLING AND STORAGE

### 7.1. Precautions for safe handling

Never eat, drink or smoke during use. Avoid direct contact with the product and breathing vapours and mist. Work in well ventilated area. Use adequate personal protective equipment as required in Section 8 of the safety data sheet. Always wash hands with soap and water before and after work. Keep away from sources of ignition and heat. Wash contaminated clothing before reuse.

### 7.2. Conditions for safe storage, including any incompatibilities

Store in properly labelled, tightly sealed container, in an ambient temperature, and well ventilated area. Keep away from heat sources, direct sunlight, and oxidizing agents.

### 7.3. Specific end use(s)

Sealing mass characterized by high adhesion to concrete, ceramics, plastics and metal surfaces. Heat the product to a temperature of 30-40°C before use.

## SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

### 8.1. Control parameters

Mineral oil – inhalable fraction TLV: 5 mg/m<sup>3</sup>, TLV-STEL: -

*Ordinance of Minister of Labour and Social Policy of 6 June 2014 on occupational exposure limits (Dz.U. item 817, 2014)*

DNEL <sub>workers</sub> (inhalation, long-term exposure)	5.4 mg/m <sup>3</sup> /8h (aerosol)
DNEL <sub>consumer</sub> (inhalation, long-term exposure)	1.2 mg/m <sup>3</sup> /24h (aerosol)
PNEC <sub>oral, mammals</sub>	9.33 mg/kg food

### 8.2. Exposure controls

#### Appropriate engineering controls:

General and local ventilation is sufficient to maintain the exposure below the limit values.

#### Eye/face protection:

In case of prolonged exposure or risk of splashes, wear safety goggles. Eyewash device is recommended.

#### Skin protection:

Impermeable protective gloves (NBR, PVC, neoprene). Use protective clothing and shoes with non-slip soles.

#### Respiratory protection:

With proper ventilation, special protective equipment is not required. Protective mask with proper filter (ABEK) should be used when mist/vapours are formed.

#### Thermal hazards:

During normal use, special protective equipment is not required. Protection of skin, eyes and respiratory system is obligatory while handling with hot product.

#### Environmental exposure controls:

Prevent from entering into soil, sewers, waterways.
